Technical Designer & System Support Specialist

Detail-oriented Computer Scientist with experience in functional testing, systems documentation, and enterprise IT support. Skilled in test execution, issue tracking, and communicating technical requirements in web-based and client/server environments.

Work Experience

Apple Developer academy - Technical Designer | Aug 2024 – Present

- Led user experience direction for iOS applications from concept to release.
- Collaborated directly with development teams during agile sprints to ensure design integrity through implementation.
- Demonstrated design concepts through sketches, system flows, and polished UI mockups.
- Improved usability scores by 30% through structured testing and iterative refinements.

Henry Ford Health - UI/UX Designer, Vision Pro | Sept 2025 - Present

- Designed a spatial healthcare application UI for Henry Ford Health using Apple Vision Pro
- Created intuitive UI/UX for patient monitoring interactions in a mixed-reality environment
- Developed and integrated optimized 3D UI assets for spatial interfaces
- Translated complex medical data into clear, user-centered visual interfaces

Wayne State University - C&IT - IT Operations & Systems Support Intern | 2023 – Present

- Supported enterprise IT systems across Networking, Security, HPC, and Help Desk departments, assisting 100+ users.
- Documented technical issues, resolutions, and service updates using structured ticketing logs to ensure tracking accuracy.
- Assisted in troubleshooting client/server application issues and validating system functionality after fixes.

Projects

Calorie Creatures - Gamified Fitness App - UI/UX Designer & QA Contributor

- Conducted structured usability testing and documented user flows and feature revisions to ensure functional accuracy prior to release.
- Collaborated with developers to validate system behavior, contributing to an 80% increase in user activity motivation.
